

Key Contributions & Achievements:

- Successfully delivered the **VISTAlink Mockup Extraction Tool enhancement (RITM26090562)**, covering development, unit testing, SIT, and UAT support, ensuring quality delivery and meeting business requirements.
- Successfully delivered the **Excellus Data Integration Project**, ensuring seamless and reliable data integration across systems with a strong emphasis on quality and performance.
- Completed a **Proof of Concept (POC) for Salesforce event reading**, enabling event-driven architecture capabilities and laying the foundation for scalable integrations.
- Designed and implemented **Salesforce to Quadient data integration** using Azure Functions, delivering the solution **on time with zero defects**, demonstrating strong ownership and execution excellence.
- Developed **CDH to Salesforce Azure Functions** and provided end-to-end **SIT and UAT support**, ensuring stable integration and timely issue resolution.

AI Adoption & Innovation:

- Proactively **leveraged AI tools and techniques across all projects** to improve development efficiency, optimize code quality, and accelerate troubleshooting and delivery timelines.

Overall Impact:

Consistently demonstrated strong technical expertise in **Azure, Salesforce integrations, and serverless architecture**, with a focus on **high-quality, defect-free deliveries**. Showcased ownership, timely execution, and continuous improvement by adopting **AI-driven development practices**, contributing to improved productivity and successful project outcomes.
